GEO Audit Report

Final Score: 78/100 · Good Band · 2026-06-11

Powered by BridgeWorks

URL: <https://ceefm.eu>

Business Type: Professional Services / Local Business

Pages Analyzed: 8

Prior Audit: 2026-06-10 (77/100)

Prepared by: BridgeWorks · office@bridgeworks.agency

Executive Summary

Overall GEO Score: 78/100 (Good)

Three of the four High-priority issues from the June 10 audit were resolved: FAQPage schema is now live on the homepage, all eight pages are in the sitemap, and the llms.txt year error ("12 years") has been corrected to "16 years." These changes push the score from 77 to 78.

The site remains in the Good band. The one High-priority item that did not change is the Google Business Profile, not yet verified. That remains the highest single-action gain available. Once verified and linked in the schema, the score is expected to reach 81-82.

Score Progression

Date	Score	Band	Driver
2026-03	16/100	Critical	Pre-engagement baseline
2026-04-03	29/100	Critical	Discovery audit, no fixes yet
2026-04-22	47/100	Poor	llms.txt, hreflang, partial schema
2026-04-30 morning	61/100	Fair	Schema completion, legal imprint, security headers
2026-04-30 evening	74/100	Fair (top)	Wikidata, IndexNow, Bing, GBP claim, LinkedIn polish
2026-06-10	77/100	Good	Funnel pages launched, TikTok
2026-06-11	78/100	Good	FAQPage schema, sitemap complete, llms.txt corrected

The engagement closes with a 62-point gain from baseline.

Score Breakdown

Category	Score	Weight	Weighted	Delta
AI Citability	78/100	25%	19.50	+2
Brand Authority	71/100	20%	14.20	0
Content E-E-A-T	72/100	20%	14.40	0
Technical GEO	92/100	15%	13.80	+2
Schema & Structured Data	83/100	10%	8.30	+3
Platform Optimization	76/100	10%	7.60	0
Overall GEO Score			77.8 → 78	+1

Issues Resolved Since June 10

Issue	Status
Funnel pages absent from sitemap	Fixed — all 8 URLs now in sitemap-0.xml
FAQPage schema missing on homepage	Fixed — FAQPage JSON-LD live in page source
llms.txt "12 years" error	Fixed — now reads "16 years of operational experience"

Remaining Issues for Victor to Action

High Priority

1. Google Business Profile — not yet verified HIGH The GBP was claimed but the postcard verification was not completed during the engagement. Every local "facility management Budapest" query that surfaces a Maps result currently excludes CEEFM. GBP verification also feeds the knowledge panel on Gemini, the Perplexity local results, and enables Google Reviews. Action: Go to business.google.com, complete the postcard verification, then add the GBP URL to the sameAs array in BaseLayout.astro. Expected impact: +3 to +4 points overall. Score would reach 81-82.
2. Privacy policy page returns 404 HIGH The contact form links to a privacy policy but the page does not exist. This is a GDPR compliance issue for a Hungarian company collecting personal data via web form. Action: Create /privacy-policy/ (English) and /adatvedelem/ (Hungarian) pages with the required GDPR privacy notice. A solicitor or GDPR template service can provide the text.
3. Homepage reads "10+ Years Experience" HIGH The company was founded in 2010. As of 2026 that is 16 years. The llms.txt correctly says "16 years." The homepage hero stat still says "10+." AI crawlers quoting this stat will cite an inaccurate figure. Action: Edit the hero component and change to "16 Years" or "Since 2010."

Medium Priority

4. Meta descriptions missing on four funnel pages

MEDIUM

/hospitality/, /residential/, /lakopark/, /vendeglatas/ have no meta description. Search engines and AI crawlers generate their own snippet text for these pages.

Action: Add a description prop to each of the four page files in src/pages/. 130-155 characters each, with location and a specific service claim.

5. Funnel pages are thin

MEDIUM

Hospitality page is approximately 370 words. Residential page is approximately 670 words. For AI models to extract substantive answers from them, each page needs to be 800 words minimum with structured proof points.

Action: Expand both pages with process documentation, client outcome data, and a 3-5 question FAQ section per page with FAQPage schema.

6. No About page

MEDIUM

/about/ returns 404. A dedicated company history page with named leadership, founding date, client count, and service scope is a core E-E-A-T signal for both AI systems and human visitors.

Action: Create /about/ with company history, Victor's bio and LinkedIn profile, and verifiable company facts.

7. lms.txt missing Limehome case study and page links

MEDIUM

The strongest third-party proof point (Limehome Budapest, 9.4 cleanliness score, 24 months above 9.0) is not referenced in lms.txt. AI crawlers reading this file first cannot discover the funnel pages.

Action: Add a ## Case Study section with the Limehome data. Add a ## Pages section with absolute URLs for all service pages.

Lower Priority

8. Sitemap has no lastmod dates

LOW

All 8 sitemap entries have no lastmod value. Crawlers cannot determine freshness.

Action: Add lastmod: true to @astrojs/sitemap in astro.config.mjs and redeploy.

9. speakable property on wrong schema type

LOW

speakable is attached to the ProfessionalService schema block. Schema.org only supports it on Article and WebPage types. The validator flags it as a warning.

Action: Remove speakable from the ProfessionalService block. Add a separate WebPage schema block per page that includes speakable with the same CSS selectors.

10. No blog or topical content

LOW

The site has no blog, guides, or resource pages. For AI models to cite ceefm.eu as an authority on facility management topics, the site needs content beyond service descriptions.

Recommended topics: "Facility management for aparthotels in Budapest," "EU hygiene compliance for residential buildings," "How to evaluate a facility management contract in Hungary."

What Was Built During the Engagement

Item	Status
ProfessionalService JSON-LD schema (comprehensive)	Live
FAQPage JSON-LD schema (homepage)	Live
robots.txt with explicit AI crawler permissions (13 crawlers)	Live
llms.txt (AI-first company summary)	Live
Bilingual hreflang tags (en/hu)	Live
Canonical URLs on all pages	Live
Security headers (HSTS, CSP, X-Frame-Options)	Live
Open Graph and Twitter Card meta tags	Live
Bing Webmaster verification	Live
GA4 analytics	Live
Google Consent Mode v2	Live
Cookie consent banner	Live
Wikidata entity (Q139592822)	Live
IndexNow integration	Live
Sitemap including all 8 pages	Live
4 service funnel pages (EN and HU)	Live
LinkedIn company page polished	Done
TikTok Business account created	Done
Cold email sequence (11 delivered, pipeline built)	Done
